SUMMARY

Senior Software Engineer with **17+ years** of commercial experience designing, building, and supporting enterprise backend systems. Strong expertise in **C#, .NET 8 / .NET Core, ASP.NET Core Web API, REST APIs, SQL Server, Entity Framework Core**, distributed systems, integrations, CI/CD, and cloud platforms. Azure-native experience with transferable knowledge to **AWS** (SQS/Lambda). Hands-on delivery in international distributed teams using Agile practices, code reviews, and full feature ownership. Open to remote Senior or Middle+ Backend / Full Stack .NET opportunities.

CORE SKILLS

Backend:	C#, .NET 8, .NET Core, ASP.NET Core, Web API, REST APIs	Cloud:	Azure, Azure Functions, Durable Functions, Azure Service Bus, App Services; cloud experience transferable to AWS (SQS, Lambda)
Data:	SQL Server, MSSQL, Entity Framework Core, Cosmos DB, relational database design	Architecture:	Microservices, Distributed Systems, Event-Driven, REST API design, Integrations
DevOps:	Azure DevOps, CI/CD pipelines, Docker, TeamCity, Nginx	Frontend:	Angular, React, TypeScript, JavaScript
Security:	JWT, Auth0, RBAC		

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Feb 2024 – Present

GlobalLogic · Remote

- Delivered production backend services for an enterprise pet insurance platform (10+ microservices on **Azure**) using **.NET 8, ASP.NET Core**, and **Azure Functions**
- Built centralized **RBAC/authorization** service using **Azure Functions** and **Cosmos DB**; implemented **JWT**-based secure inter-service communication
- Delivered production modules: document conversion, storage service, batch processing, and internal tooling
- Created Azure infrastructure, deployment pipelines, and **CI/CD** processes in **Azure DevOps**
- Wrote technical specifications and documentation; participated in code reviews and Agile delivery
- Contributed to **Angular** portal: integrated **Auth0**, implemented token refresh and auto-logout; delivered standalone **React** internal module
- Actively used **GitHub Copilot** across coding, documentation, and reviews to accelerate delivery

Tech Stack: .NET 8, C#, ASP.NET Core, REST APIs, Azure Functions, Cosmos DB, Azure Service Bus, JWT, Auth0, Angular, React, Azure DevOps

Senior Software Engineer

Jul 2021 – Dec 2023

Grid Dynamics

- Designed and delivered backend solutions from scratch using **C#, .NET, REST APIs**, and **SQL Server**
- Automated driver-vehicle matching logic for optimized delivery routing, improving logistics efficiency
- Participated in architecture and technical decision-making; built and maintained **CI/CD** pipelines
- Performed code reviews, engineering quality improvements, and stakeholder communication in a distributed team

Tech Stack: C#, .NET, REST APIs, SQL Server, CI/CD, Enterprise Systems

Senior .NET Developer

Nov 2017 – Nov 2021

FiduciaSoft

- Built and maintained business applications on **ASP.NET Zero** platform for multiple customer projects
- Developed backend and frontend features using **.NET Core, ASP.NET Web API, Angular, SQL Server, Docker**
- Participated in solution design, code reviews, database-backed feature delivery, and production releases
- Automated **CI/CD** processes using **TeamCity**, enabling faster and more reliable deployments

Tech Stack: .NET Core, ASP.NET Web API, ASP.NET Zero, Angular, SQL Server, Docker, TeamCity

Senior Engineer / Tech Lead roles

2004 – 2017

Various companies — fintech, CRM, enterprise platforms

Senior engineering and leadership roles across outsourcing, product, and enterprise environments

Worked with **.NET, ASP.NET, SQL Server, Oracle, TeamCity**, and large-scale application delivery

PERSONAL PROJECTS

StoreMate — Personal Inventory Management Platform

storemate.grynco.com.ua

SaaS-style product for home, storage, and small business asset organization — built end-to-end as a solo project.

- Hierarchical location management, QR-code workflows, item image management, search, and admin tooling
- Integrated **AI-powered item description generation** from uploaded photos to simplify data entry
- Full-cycle ownership: backend architecture, frontend development, database design, **CI/CD**, hosting, and ongoing delivery

Tech Stack: .NET 8, ASP.NET Core Web API, React, SQL Server, Docker, TeamCity, Nginx, MinIO, AI APIs

EDUCATION

Vinnitsia National Technical University — Computer Science

ADDITIONAL INFORMATION

- 17+ years of commercial software development — enterprise, insurance, fintech, and product domains
- Strong backend focus with practical full-stack capability; comfortable owning development, deployment, and production support
- Experience delivering in distributed international teams with Agile practices
- Actively use AI-assisted development tools (GitHub Copilot, JetBrains AI Assistant, Junie, Codex CLI, Claude) to improve productivity, implementation speed, and code quality
- English: B2 / Upper Intermediate (written and spoken)
